HAND-PAINTED WALL COVERINGS

**At Vahallan, sustainability and artistry go hand in hand.**

As a small, dedicated studio specializing in hand-painted wallpaper, we take pride in creating unique, high-quality wallcoverings that reflect both craftsmanship and care for the environment. Our production process uses only interior latex paints—never oils, lacquers, or solvents—and we completely avoid vinyl. All of our paints are low in VOCs, supporting healthier indoor air quality for your clients. With every roll, we strive to offer interior designers a beautiful, eco-conscious solution that aligns with modern green design values.
